

LIGHT MASTER

AFFORDABLE, VERSATILE, 4 CHANNEL, 1800 WATT
MIDI CONTROLLED LIGHTING DIMMER

4 CHANNEL LIGHT MASTER

The Light Master is a lighting dimmer capable of controlling 4 separate channels of lighting or other special effects. Each unit is rated at 1800 watts total power, and each individual lighting channel is capable of driving a full 600 watts. Each channel can be independently dimmed.

Each of the Light Master's four independent lighting channels (LC) are assigned a Midi Note and Controller number based on the setting of the Programming DIP Switches (or PDS) positions found on the unit. The intensity or brightness of the light being driven depends upon the Note On Velocity or Controller Value. Each LC drives a standard "Edison" receptacle on the US version, and a standard DIN power connector on the 220 volt units.

POLY AFTERTOUCH

The Light Master can also respond to Poly Aftertouch commands to control the dimming of each LC.

PROGRAM CHANGES

The Light Master also responds to MIDI Program (or patch) Change commands to instantly recall one of 64 factory pre-programmed scenes. Additionally, program changes 64 – 127 will activate various chase sequences built into the unit.

MECHANICAL

Lightweight Aluminum Chassis

Height — 1.375"

Weight — 2.563 lbs.

Length — 12.00" (13.25" including tabs)

SAFETY PRECAUTIONS

Keep in mind that this dimmer pack operates in 120 volt AC power and that this power is present at the receptacles located on the unit. All normal safety precautions concerning any normal AC receptacle should be followed whenever this product is used or connected to an AC voltage source.

MIDI THRU

An electronically regenerated Midi Thru is provided. This allows you to daisy chain as many units together as needed on a single Midi cable with no signal degradation.

POWER REQUIREMENTS

The Light Master requires 100 – 120 VAC at 50hz or 60 Hz. It is also available in 220 – 240 VAC. A single 15 amp fuse feeds all four channels on the 120V versions, while 4 separate 6.3 Amp fuses are used on the 220V version. A grounded three conductor 6 foot 14 AWG line cord with a power connector is supplied with all units.

SYSTEM EXCLUSIVE

The unit will respond to System Exclusive Message to report back its current settings and firmware version number.
