

UNIVERSAL MIDI BOARD

UMB CONTOLLERS
AFFORDABLE MIDI INTERFACE MODULE FOR A
VARIETY OF APPLICATIONS

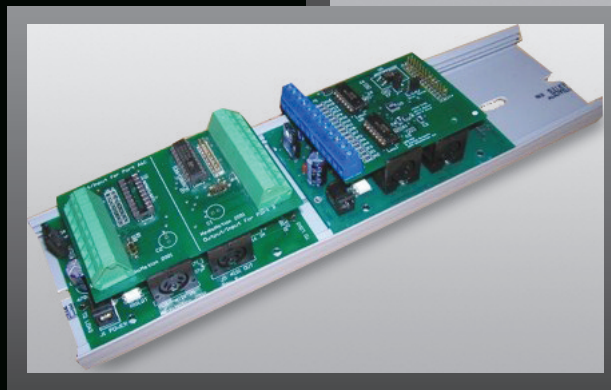

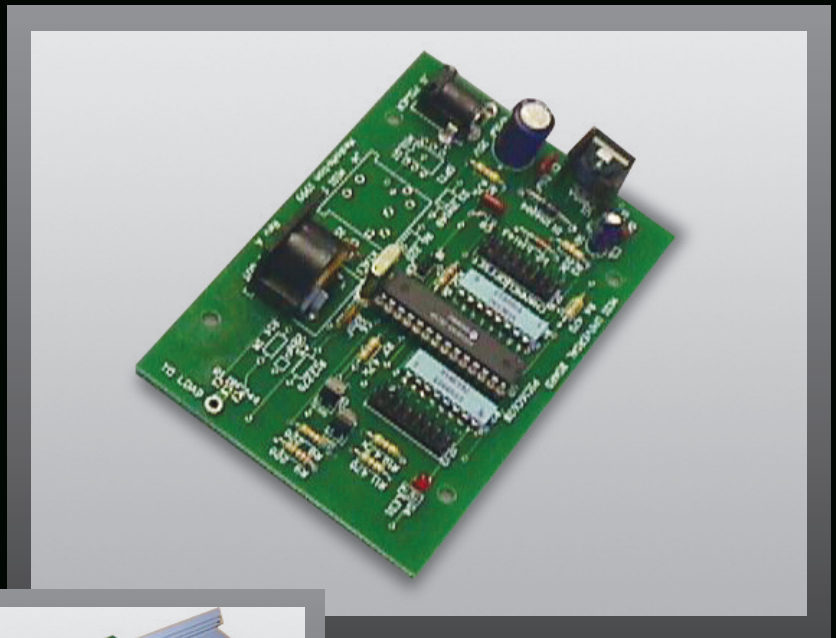

FEATURES

- *Flexible main board with daughter board options*
- *Stand-alone or operated by any MIDI device including the MOE or ShowFlow™ Controllers*
- *Fits in Snap Track mounting*

MediaMation's Universal Midi Board allows you to harness the power of the industry standard Midi protocol from ANY computer or any other Midi device including our MOE Controller or ShowFlow™ software.

The basic UMB has eight contact closures which send Midi notes. Low cost Daughter Boards plug onto the UMB and offer a variety of interfaces and functions.

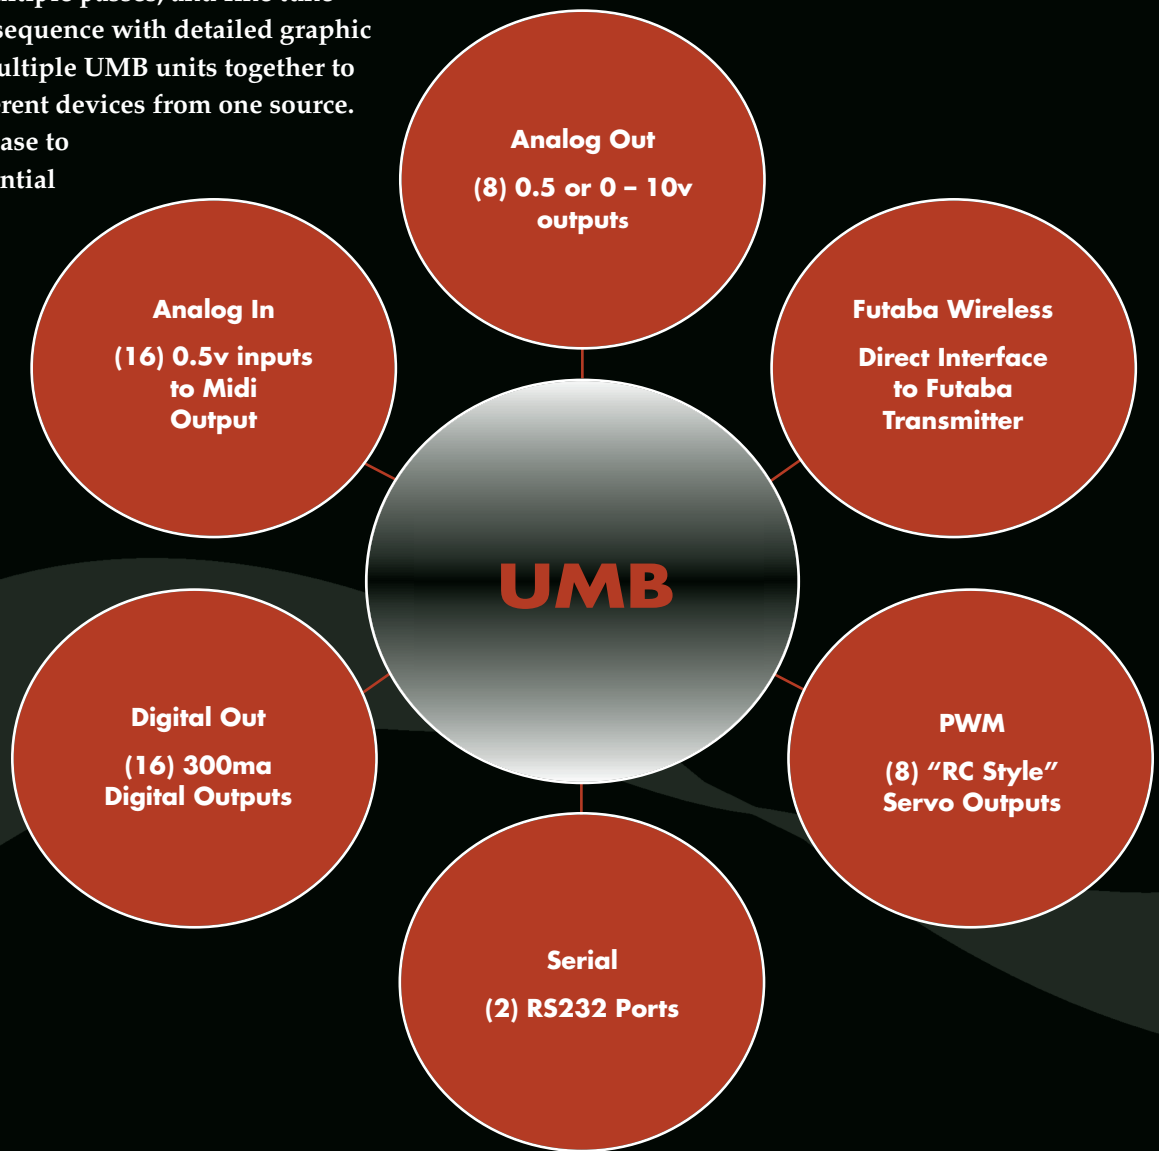

Whether as part of a stand-alone system, or used as low cost expansion modules for larger systems, the UMB series offers value and flexibility in an easy to use format with a Midi interface.

The UMB main board (above) and the UMB DO-16 and AO-8 mounted on a snap track (left).

UMB

Utilizing any Midi sequencing program or Midi controller, you can control all of your devices in real time. Overdub with multiple passes, and fine tune your motion profile or sequence with detailed graphic editing. Daisy chain multiple UMB units together to control a variety of different devices from one source. Low cost, reliable and ease to use, the UMB is an essential part of your show, fountain or exhibit.
